Subject: **CIRCULATION OF PROPOSED CRITERIA AGAINST EACH PEC CATEGORY WITH RESPECT TO WORK PROJECTS**

Authority: These proposed criteria are being issued under the power conferred to the Authority through section 5 of B-PPRA Act 2009.

The undersigned is directed to refer to the subject cited above and to state that, in pursuance of the principles enshrined under Rule 4 of the Balochistan Public Procurement Rules, 2014, which mandate that all procurements shall be conducted in a fair, transparent, and equitable manner ensuring value for money, this Authority has developed a proposed evaluation framework aligned with Pakistan Engineering Council (PEC) each category vis-à-vis project cost for civil works procurements.

2. This initiative has been necessitated in light of recurring grievances received from bidders, wherein concerns have been raised regarding the adoption of restrictive, inconsistent, and, in certain instances, disproportionate evaluation criteria by Procuring Agencies. Furthermore, during the course of examination of procurement processes and adjudication of complaints under the relevant provisions of the B-PP framework, this Authority has observed significant variations in evaluation practices, often lacking proportionality to the scope, complexity, and financial magnitude of the projects.

3. It has been noted that the imposition of excessively stringent qualification requirements tends to curtail competition, whereas inadequately defined criteria may compromise the assessment of bidders' technical and financial capacity, thereby affecting the quality and timely execution of public works.

4. In order to address the aforesaid concerns and to promote standardization in line with best procurement practices, the proposed eligibility and evaluation criteria have been formulated with the following objectives:

- To ensure a fair and level playing field for all prospective bidders.
- To promote transparency, consistency, and objectivity in the bid evaluation process
- To align qualification requirements with the nature, complexity, and cost of the projects.
- To safeguard quality, efficiency, and value for money in public sector civil works.

5. The proposed criteria are hereby circulated as a guiding and facilitative framework for Procuring Agencies while formulating bidding documents. It is explicitly clarified that these criteria are advisory in nature and shall not be construed as mandatory binding. However, Procuring Agencies are encouraged to adopt these guidelines, to the extent practicable, in order to ensure rational, proportionate, and non-restrictive evaluation practices.

6. Any deviation from the proposed framework may, where deemed necessary, be duly justified and recorded in writing, ensuring that such departures are aligned with the spirit of competition, transparency, and fairness as envisaged under the B-PP Rules, 2014.

7. All Administrative Departments are requested to circulate this directive and enclosed proposed criteria to their attached departments, subordinate offices, and field formations for information, awareness, and appropriate consideration in all forthcoming civil works procurements.

This is issued with the approval of competent authority.
